

Malinda Sampath

Ratnapura, Sri Lanka • +94701894658 • malindasampath45@gmail.com • linkedin.com/in/malinda-sampath • github.com/malinda-sampath

Software Engineer with 1+ year of hands-on experience building enterprise-grade backend applications in Java and Spring Boot for large enterprise clients. Experienced designing REST APIs and microservices, containerizing and deploying workloads with Docker, Kubernetes, and Helm, and automating CI/CD pipelines on Azure DevOps and GitHub Actions. Solid theoretical grounding in event-driven architecture concepts and Solace messaging. Skilled in secure authentication/authorization using JWT, Keycloak, and WSO2 Identity Server. Fast learner with a strong distributed-systems foundation, actively growing into streaming platforms (Kafka), Go, and gRPC.

CORE TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, C#
- **Backend & Architecture:** Spring Boot, Spring Security, Microservices Architecture, REST APIs
- **Event-Driven Architecture:** Theoretical knowledge of EDA principles and patterns, Solace
- **Containers & Orchestration:** Docker, Kubernetes (K8s), Helm
- **Cloud & DevOps:** Azure, Azure DevOps, Azure Pipelines, GitHub Actions, CI/CD, Nginx, DigitalOcean
- **Databases:** MySQL, Microsoft SQL Server
- **Identity & API Management:** Keycloak, WSO2 API Manager, WSO2 Identity Server (IS)
- **Version Control & Collaboration:** Git, GitHub, Bitbucket, Jira, Postman, Figma

PROFESSIONAL EXPERIENCE

X-Venture Global Solutions (Pvt) Ltd - Project OCEANSX

Software Engineer 06/2026 - Present

- Automate SCIM user provisioning across multiple environments using Azure Pipelines, integrating Azure Key Vault for secure secrets management.
- Prototype MCP (Model Context Protocol) and AI-gateway integration patterns for enterprise identity solutions as part of active project delivery.

Software Engineer - Intern 06/2025 - 06/2026

- Worked as an Identity and Access Management (IAM) integration and development specialist on OCEANSX, a large-scale identity platform for enterprise and government clients.
- Built authentication and authorization UI flows (login, registration, profile management) using JSP, JavaScript, React, and CSS.
- Developed Singpass federated authentication using Spring Boot and WSO2 Identity Server integration for secure cross border identity federation.
- Delivered end-to-end Azure cloud deployments via Azure DevOps pipelines, covering CI/CD automation, environment provisioning, and application monitoring/observability.
- Deployed and managed containerized microservices using Docker, Kubernetes, and Helm charts across multiple environments.
- Collaborated in Agile/Scrum teams, sprint planning, daily stand-ups, and backlog refinement.

PROJECTS

LMS 06/2026 - Present

In-progress LMS providing students secure, role-based access to learning materials via a centralized platform with REST APIs, React frontend, and integrated payment gateway support.

Technologies : Spring Boot, Spring Security, React, Keycloak

Personal Portfolio Website — malindasampath.com

06/2026 - 07/2026

Personal portfolio site showcasing projects, skills, and experience, built with a modern frontend stack and a fully automated cloud deployment pipeline.

- Built the site using React, TypeScript, and Tailwind CSS.
- Set up CI/CD using GitHub Actions and Azure Pipelines for automated build and deployment to Azure.

Technologies: React, TypeScript, Tailwind CSS, GitHub Actions, Azure Pipelines, Azure, CI/CD

APIRRA, API Testing and Explorer Portal

05/2026 - Present

Web-based platform for testing and exploring REST APIs via OpenAPI specifications, focused on simplicity and developer productivity. Includes request execution, response visualization, and interactive API documentation.

- Building Spring Boot backend services for API persistence, plus authentication/authorization and multi-user, SaaS-based workspaces.

Technologies : Spring Boot, React (TypeScript), TailwindCSS

Mail Tracking System

12/2024 - 04/2025

University of Ruhuna

- Implemented secure JWT-based authentication and role-based access control for administrators, mail agents, and super admins.
- Engineered a high-accuracy barcode generation and tracking system for fast, reliable mail identification and retrieval.
- Built real-time mail tracking using WebSocket, improving visibility of mail status updates across users.
- Automated mail workflow processes using MySQL Event Scheduler, reducing manual intervention.
- Integrated Spring Boot backend with a React (TypeScript) frontend for a responsive user experience.

Technologies : Spring Boot, React (TypeScript), MySQL, WebSocket, JWT Authentication, Docker, DigitalOcean, GitHub Actions

EDUCATION

Bachelor of Computer Science (BCS) • University of Ruhuna

08/2022 - 10/2025

Physical Science (A/L) • Sivali Central College

01/2011 - 12/2019

CERTIFICATIONS

Solace Certified Developer Practitioner

WSO2 Certified Identity Server Developer - V7.0

Docker Kubernetes Masterclass (Ongoing)

Master Git and GitHub

Postman API Fundamentals Student Expert

VOLUNTEERING & LEADERSHIP

Computer Science Students' Community — University of Ruhuna

Senior Editor

InsurgeX_1.0 Intra-University Hackathon

Marketing Team Lead

Leo Club — University of Ruhuna

Video Editor
